

asano S4 music server

asano M4 4 zone amplifier

## Basalte adds new server and amplifier and active speaker concept to its multiroom audio system

The Asano multiroom audio system amplifies and distributes uncompressed hi-fi music in high-end residences all over the world, KNX-integrated or standalone. At Architect@Work Kortrijk, Basalte presents its S4 music server with Asano Music app for iOS and Android, along with a new amplifier and a speaker concept.

The new S4 music server hosts 4 digital audio streams to listen to your own and streamed music. With the beautiful app and KNX-integration, you can play your music anywhere: perfectly synchronised, in crystal clear quality.

Basalte also presents M4, a new 4-zone amplifier, to create a standalone multiroom audio system with the S4 music server. Both in KNX and standalone, Asano's decentralised setup results in an unprecedented flexibility and scalability to a virtually unlimited number of zones.

### Speaker concept

At Architect@Work Kortrijk, Basalte also demonstrates its active speaker concept. The design is customisable, as the cabinet is available in the same quality materials as Basalte's switches. You can also choose from a rich variety of luxury front cover fabrics, for any type of interior. Combined with top of the line drivers and integrated ICEpower® amplification, these speakers offer a stunning listening experience!

Basalte demonstrates Asano, new design switches, Eve for iPad Pro 9.7" and much more at its **stand #284 – Architect@Work Kortrijk**.
