

Eve wall mount for iPad and iPod touch wins Red Dot Design Award 2016

A professional jury of design professionals recently announced the winners of the Red Dot Design award competition, honouring qualitative design for products worldwide. Basalte's elegant Eve wall mount for iPad is one of the 2016 winners.

The professional judges admired the great design competence and how Eve has become one of the industry's top-notch products. Basalte's Managing director Klaas Arnout is delighted with this recognition:

"Being awarded by Red Dot is among the greatest recognitions any designer can receive. A reward like this stimulates us, as a Belgian design company, to further develop high-quality products for the modern home."

Eve mount for iPad and iPod touch

Eve is an elegant wall mount for iPad or iPod touch. It is made of high-grade aluminium and is available in various finishes such as brushed aluminium or black and satin white. The design is sleek and understated and complements the design of today's most popular tablet. Eve is available for iPad Pro, iPad Air, iPad mini and iPod touch.

Installation of Eve is very simple, as you only need two screws and a single-gang wall box. For commercial applications and to prevent unwanted extraction of the iPad, Eve is also available with a security cover.

Red Dot Design Award

The Product Design competition already exists since 1954. Its award, the Red Dot, is an internationally recognised quality seal with a jury following strict design requirements. More than 40 jury members evaluated 5.214 products from 57 countries. The jury is composed of independent designers, journalists and design professionals.

Eve already won the « iF product design award » and « The Resi Awards » in 2013 and was nominated for the « German Design Award » in 2014.
