

Basalte presents new finishes for touch-sensitive switches

Belgian company Basalte presents the new line of finishes for its touch-sensitive switches Sentido and Deseo. This new combination of precious metals in a trendy, handcrafted finish enables interior designers to add Basalte as a true design statement in their projects.

Following the popularity of its hand carved fer forgé finish, Basalte added three new looks to the fer forgé range: the sophisticated gunmetal, the classic bronze and the sparkling rosé finish. This artisanal yet timeless look blends in nicely with the interior or can stand out as a true design statement.

Additionally, Basalte introduces the new soft copper finish, replacing the grey fer forgé in the classic finish range. Soft copper appeals to today's styles and trends, making it that gentle touch or beautiful eye-catcher for any interior.

These novelties are added to the existing range of design switches in for example aluminium, bronze or glass.

Belgian design for the smart home

Basalte develops design products for the smart home, combining high-grade materials with an unequalled comfort in use and functionalities. In the past few years, the touch-sensitive Sentido and Deseo switches already won multiple international design awards such as the Red Dot and German Design Award, setting a new standard in the industry.

Basalte demonstrates the new finishes, its new S4 music server, its active speaker concept and much more at its **stand #284 – Architect@Work Kortrijk**.
