

Basalte presents new design HVAC control panel

Deseo combines elegant design with intuitive functions

At Architect@Work Kortrijk, Basalte announces a new version of its Deseo controller for easy HVAC controls. Deseo integrates with KNX, the international standard for home automation.

Since 2008, Basalte designs and develops products for high-end residential projects worldwide, including its popular Deseo line of touch-sensitive switches.

Handmade in Belgium, Deseo combines elegant design with high-grade materials and innovative technology. The new version with a simple and innovative OLED user interface allows you to conveniently manage the set point, fan speed & temperature modes. Deseo also has an integrated temperature sensor and thermostat logic. A nice additional feature is the multitouch functionality to quickly turn the lights on and off, using a welcome and goodbye scene.

Basalte demonstrates Deseo, its new S4 music server, its active speaker concept and much more at its **stand #284 – Architect@Work Kortrijk**.
