## Basalte introduces thinnest iPad dock ever

At ISE 2018, Basalte introduces an iPad docking station in the same minimalist design as its fixed Eve mounts for iPad & iPod touch. Eve Plus lets users mount the iPad in any orientation while keeping it permanently charged.

Keep your iPad within reach with the Eve Plus docking station: always charged and ready to take with you for all applications at home and at work: to play your favourite music around the house, to use it in meetings or to take orders in your restaurant.

Eve Plus has the same minimalist design as the fixed Eve mounts and is precision machined from high grade aluminium, to fit even the most high-end residences, offices and other venues. Consequently, Eve Plus offers both the slimmest case and the smallest base ever. Just slide the iPad in the case and magnetically attach it on the Eve Plus wall base to hold and charge.

Eve Plus cases are available in a satin white, brushed black and brushed aluminium finish. The wall base has the same form & dimensions as the Basalte switches and sockets. It's available in the case's aluminium finishes, as well as in brass, bronze, copper and more, to perfectly match the Basalte design switches.

More details follow. Discover Eve Plus at the **Basalte stand 5-R120** at ISE 2018.
